Time Offset:	Start Time:
0:20:00	11:01:10

**Timer Notes:**

1) Set the Time Offset column. This allows you to synchronize the watch used for timing with the timer in Excel.

2) Click the **Set Start Time** button when the Time Offset equals to the race time.

Ex: If the Time Offset is set to "0:01:00", click the **Time** button when the race time equals 1 minute.

3) When each racer crosses the line click the **Set Time** button.

**Notes:**

**GREY** highlights signify that formula's are in cells! **Don't Touch!**

Copy and Paste Special values when finished to manipulate data and remove the formulas.

**GREEN** highlights are the columns where data entry is required.

Add Bib # in column B and Finish Time in column G. The rest of the columns will be populated automatically.

When finished entering the results, copy the data in columns C to H, and 'paste special' as values or text/numbers/time.

Sort columns B through H based on Total Time when all data is entered.

Before printing, highlight the cells that are colored and remove the fill or set to white. Also, delete this text box before printing results, or do not include this in the print area.
